# Omega Core Audit Light <sup>TM</sup>

## Free Edition

For Oracle Database, with built-in SIEM integration

**Continuous monitoring of the standard (traditional) and fine-grained audit trails of your mission-critical Oracle.**  
**Instant delivery of audit trail records straight to your Splunk SIEM repository!**

### Key Features & Benefits

- Automatic operations
- Monitors at DB level
- Standard Auditing monitoring
- Fine-Grained Auditing monitoring
- Unified Audit Trail normalization
- Out-of-box solution
- Software-only solution
- Easy and simple operation
- Quick and minimal setup

Omega Core Audit Light provides a software security solution to help customers approach the complex and difficult security challenges in Oracle Database Systems - protecting against outsider and/or insider threats, unauthorized access and enforcing duty separation in meeting regulatory compliance requirements, those being external or internal.

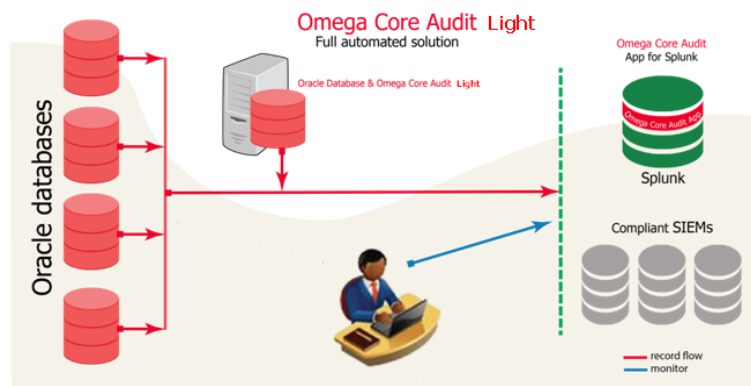

Omega Core Audit Light edition is a simplified implementation of the Omega Core Audit (the full edition), that integrates the Oracle database audited events information with external SIEM-like systems for tamper-proof storage, reporting, alerting and analyses.

### Integration

- Interface to Splunk SIEM \*  
 Splunk SIEM operations powered by:  
 Omega Core Audit App for Splunk

It is a 100% Oracle PL/SQL solution, installed inside the Oracle database and working as an Agent, periodically monitoring the database Standard (traditional) and Fine-Grained audit trails; it then delivers them to Splunk SIEM – built-in supported.

\* More SIEMs and Central Log Collection systems will be built-in supported in the next releases.
